ABOUT THE ORGANISER

Odisha Assembly
of Small and Medium Enterprises
(OASME)

Founded on 12th August 1985, OASME has served for over four decades as a common forum for the cottage, handicraft, micro, small and medium enterprises of Odisha. The Assembly guides entrepreneurs, offers free consultancy, assists in the establishment of new industrial units and publishes profiles, journals and souvenirs that carry industry knowledge to the last mile.

Today OASME works as a bridge between Odisha's MSME community and the State and Union Governments — taking industry concerns into policy forums and carrying the benefits of schemes such as PMEGP, PM Vishwakarma, CM-SRIM, the Odisha MSME Development Policy and the Odisha Exports Policy back to enterprises on the ground. PROPACK Odisha is OASME's flagship platform for the packaging, printing, plastics and processing value chain.

PROPACK Odisha 2027 is organised and delivered by OASME. Three earlier editions have established it as the State's principal meeting ground for the packaging, printing, plastics, converting and processing value chain, drawing exhibitors and buyers from across India.

PROPACK ODISHA 2027 AT A GLANCE

Edition: 4th

Dates : 25 – 28 February 2027 (four days)

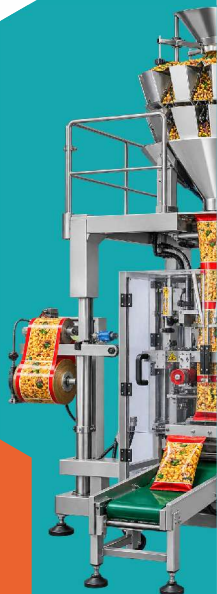

Venue: Janata Maidan, Chandrasekharpur, **Bhubaneswar** — the same ground that hosted Utkarsh Odisha: Make in Odisha Conclave 2025

Scale: 150+ exhibiting companies across a fully covered, air-conditioned hall

Expected footfall: 10,000+ trade visitors, buyers and decision-makers from Odisha, Eastern India and beyond

Format: B2B trade exhibition + four-day conference programme + structured buyer-seller meets

Entry: Free for registered trade visitors; all seminar sessions open to delegates at no charge

WHY PACKAGING, WHY NOW

Packaging is no longer a down downstream cost line — it is a growth industry in its own right, and one of the fastest-expanding manufacturing segments in India.

- India's packaging market is estimated at over USD 100 billion and is projected to grow at a double-digit compound rate through 2030, on the strength of food processing, pharmaceuticals, e-commerce and quick commerce.
- India's food and beverage packaging market alone is projected to rise from roughly ₹3.32 lakh crore in 2025 to about ₹4.54 lakh crore by 2030.
- Paper and paperboard packaging is the fastest-growing material segment, with close to three-fourths of India's paper production already coming from recovered and recycled fibre.
- Extended Producer Responsibility (EPR) obligations and the Plastic Waste Management Rules have made recycled content, barrier coatings and design-for-recycling a boardroom priority — creating a fresh wave of machinery and material demand.
- The Union Government's emphasis on value addition over raw-material export — restated by the Hon'ble Prime Minister at Utkarsh Odisha 2025 — places packaging, processing and converting at the centre of India's manufacturing agenda.

ODISHA: THE GROWTH ENGINE OF EASTERN INDIA

Odisha has moved decisively from a resource-supplying State to a manufacturing and value-addition destination. The State's development agenda is anchored in Vision 2036 — timed to Odisha's centenary — and Vision 2047, aligned with the national goal of Viksit Bharat @ 2047.

A clearly stated destination

- **Samruddha Odisha 2036:** a USD 500 billion State economy by 2036, the centenary year of Odisha's formation.
- **Viksit Odisha 2047:** a USD 1.5 trillion economy by 2047, contributing directly to Viksit Bharat.
- **Citizen-built vision:** the Vision 2036 and 2047 documents were framed with inputs from over 3.2 lakh citizens of the State.

Investment momentum

- **Utkarsh Odisha:** Make in Odisha Conclave 2025, inaugurated by the Hon'ble Prime Minister at Janata Maidan, Bhubaneswar, drew 593 investment proposals worth about ₹16.73 lakh crore with an employment potential of 12.88 lakh.
- The State has approved a large pipeline of industrial projects since June 2024, with an expected employment generation of around 6 lakh persons.
- **GO-EAST** — Government of Odisha Eastern Investment Accelerator and Special Task Force — offers investors from eastern and north-eastern India a dedicated facilitation mechanism, policy support and fast-tracked implementation through IPICOL.
 - Amendments to the Industrial Policy Resolution have extended Thrust Sector status to 15 economically backward districts, opening incentives for non-mineral, value-adding industries such as packaging, printing and food processing.

Ease of Doing Business Measured, not claimed

MSMEs: THE HEART OF THE ODISHA STORY

- GO-SWIFT single window: a unified portal for industrial approvals, with several categories of clearance now issued within a day.
- Deregulation 1.0 and 2.0: industrial approval timelines compressed from close to 400 days to under 160 days, with a stated State target of under 100 days.
- Infrastructure commitment: Odisha invests approximately 6.1% of its GSDP in infrastructure development.
- Fiscal strength: Odisha was ranked at the top of NITI Aayog's Fiscal Health Index.
- Land availability: an industry-ready land bank accessible through GO-SWIFT and the GIS-based Government of Odisha Industrial Portal for Land Use and Services (GO-PLUS).

Investment Regions and Industrial Infrastructure

- PCPIR, Paradeep: a 284 sq. km. Petroleum, Chemicals and Petrochemicals Investment Region anchored by IOCL's 15 MMTPA refinery — the feedstock base for polymers used in films, pouches, woven sacks and rigid packaging.
- Paradeep Plastic Park: 120 acres developed by IDCO with IOCL, with a Plastic Products Evaluation Centre, CIPET-linked skilling, tool room and design facilities — India's first plastic park to become operational.
- National Investment and Manufacturing Zone, Kalinganagar and the port-based manufacturing zone at Dhamra.
- Ports and logistics: Paradeep, Dhamra and Gopalpur, supported by multi-modal logistics infrastructure and a dedicated CONCOR hub — positioning Odisha as India's eastern gateway to South-East Asia.

The Government of Odisha has set out to make the State the

MSME gateway of Eastern India. For an

exhibition built around packaging, printing and processing machinery — industries overwhelmingly served by and serving MSMEs — there is no more relevant policy backdrop.

- MSMEs contribute close to 30% of Odisha's Gross State Domestic Product and are the largest generator of employment after agriculture.
- Over 4.32 lakh enterprises in the State have drawn benefit from Central and State schemes.
- Nearly 4,900 enterprises have received subsidy support of about ₹146 crore under PMEGP, with women accounting for 42.5% of beneficiaries.
- More than ₹23,000 crore in collateral-free credit has been extended under credit guarantee schemes.
- CM-SRIM — the Chief Minister's Scheme for Reimbursement of Interest to MSMEs — directly reduces the working-capital cost of manufacturing units.
- Multi-product MSME parks are being developed across all 30 districts, with 40–50% of park land reserved for local vendors.
- Dedicated printing and packaging clusters, alongside engineering and cashew processing clusters, are planned in the next phase of MSME park development — placing this sector squarely on the State's industrial roadmap.
- Odisha's exports have crossed ₹95,568 crore, supported by the Odisha Exports Policy and District Export Facilitation Cells.
- Five Odisha enterprises have listed on the NSE Emerge SME platform under the MSME Department–NSE partnership, opening a new capital route for growing units.
- Union initiatives — PM Vishwakarma, PMEGP, PM-FME, ZED certification, the Credit Guarantee Scheme and One District One Product.

PLASTICS: ODISHA'S FEEDSTOCK ADVANTAGE

Plastics form one of the largest exhibiting sections at PROPACK Odisha 2027 — and Odisha is one of the few States in India that can offer polymer processors an integrated raw material, infrastructure and market proposition in one place.

- **Feedstock at source:** IOCL's 15 MMTPA refinery at Paradeep supplies polypropylene, ethylene and other petrochemical feedstock within the PCPIR, cutting inbound freight for processors located in the State.
- **Paradeep Plastic Park:** 120 acres developed by IDCO with IOCL — India's first plastic park to become operational — offering a Plastic Products Evaluation Centre, testing laboratory, tool room, design and product development facilities and CIPET-linked skilling.
- **Downstream demand:** woven sacks, FIBCs, films, pouches, injection-moulded components, pipes, closures and rigid containers are drawn on by Odisha's mineral, fertiliser, cement, food processing, pharmaceutical and e-commerce sectors.
- **Policy support:** polymer and plastic processing is a recognised cluster segment under the Odisha MSME Development Policy, with capital investment subsidy, stamp duty exemption and interest reimbursement under CM-SRIM available to eligible manufacturing units.
- **Skilling and testing:** CIPET Bhubaneswar provides a ready base of trained polymer technicians and accredited testing services for processors setting up in the State.

The plastics section of the exhibition will bring together processing machinery, moulds and tooling, polymers, masterbatches and additives, recycling and reprocessing technology, and the testing and compliance services that the EPR regime now demands.

SUSTAINABLE PACKAGING: THE NEXT DECADE'S BUSINESS

PROPACK Odisha 2027 will place sustainability at the centre of its exhibition and conference agenda — in step with national commitments under Mission LiFE, Swachh Bharat, the Plastic Waste Management Rules and India's net-zero pathway.

- Recycled content mandates under EPR are reshaping material choice across rigid and flexible packaging.
 - Paper-based, mono-material and compostable formats are moving from pilot to mainstream.
 - Recovered-fibre-based corrugation and kraft-based packaging remain among the most circular material systems available to Indian industry.
 - Energy-efficient converting, solvent-less lamination and waste-reduction technologies deliver both compliance and cost advantage.

A dedicated conference track will bring together regulators, brand owners, converters and technology providers to translate these mandates into practical, bankable decisions for MSMEs.

She'BUILDS ODISHA

A DAY FOR WOMEN IN ENTERPRISE

One full day of PROPACK Odisha 2027 is dedicated to women entrepreneurs, in alignment with the State's women-led development agenda.

- The Women Entrepreneurship Platform (WEP) Odisha Chapter provides mentoring, market linkage and financing support to women-led enterprises.
- Subhadra Yojana and the Lakhpati Didi mission have brought lakhs of rural women into enterprise and self-employment across Odisha.
- Women already account for over 42% of PMEGP beneficiaries in the State.

The SheBuilds Odisha day will feature women industry leaders, financing institutions, skill partners and a curated buyer–seller session for women-owned enterprises.

WHO SHOULD EXHIBIT

- Packaging machinery, materials and equipment
- Corrugated box making machinery and corrugation plant
- Paper, board, film, foil, inks and consumables
- Flexo, gravure, offset, digital and screen printing presses
- Label printing and converting equipment
- Coding, marking, labelling and traceability solutions
- Barcodes, RFID and serialisation
- Rigid and flexible packaging
- Injection moulding, blow moulding, extrusion and thermoforming machinery
- Polymers, resins, masterbatches, compounds and additives
- Moulds, dies, tooling and mould-making services
- Plastics recycling, reprocessing and granulating plant
- Woven sacks, FIBC and bulk packaging solutions
- Food processing and production equipment
- End-of-line packaging, palletising and automation
- Supply chain, logistics, warehousing and material handling

- Testing, laboratory and quality-control equipment
- Recycling, waste management and sustainable material technologies
- Industrial automation, robotics and Industry 4.0 solutions
- Energy-efficiency, solar and utility solutions for packaging plants
- Financial institutions, certification bodies, consultancies and industry associations

VISITOR PROFILE *Indicative and not restrictive.*

- Packaging materials manufacturers
- Plastic processors and moulders
- Woven sack and FIBC manufacturers
- Plastics recyclers and reprocessors
- Corrugated box manufacturers
- Printers and converters
- Food processing units
- Agro industries
- Dairy product manufacturers
- Fish, seafood and meat processors
- Frozen, preserved and dehydrated food manufacturers
- Snack and confectionery manufacturers
- Beverage, brewing, canning and bottling units
- Pharmaceutical producers
- Cosmetics and personal care manufacturers
- Chemical product manufacturers
- FMCG and consumer goods manufacturers
- Electronics manufacturers
- Industrial product manufacturers
- Contract packagers and retail packagers
- E-commerce and quick-commerce fulfilment operators

- Food exporters, retailers, distributors and wholesalers
- Machinery importers, dealers and distributors
- Cold chain and refrigeration operators
- Water treatment and environmental engineers
- Consultants, food scientists and technologists
- Government departments, PSUs, academia and R&D institutions

EXHIBITOR PROFILE

Indicative and not restrictive.

Plastics Processing, Polymers and Tooling

- Injection moulding machines
- Blow moulding machines
- Extrusion lines and extruders
- Blown and cast film lines
- Thermoforming machines
- Woven sack and FIBC plant
- Pipe and profile extrusion
- Moulds, dies and tooling
- Hot runner systems
- Chillers, dryers and auxiliary equipment
- Granulators, shredders and recycling plant
- Polymers, resins and compounds
- Masterbatches, additives and colourants
- Films, sheets and laminates
- Closures, caps and preforms
- PET bottle and preform machinery
- Polymer testing and evaluation services

Packaging Materials and Formats

- Paper and board packaging
- Corrugated cartons
- Flexible packaging
- PET and plastic packaging
- Metal packaging
- Glass packaging
- Beverage packaging
- Cosmetic packaging
- Pharmaceutical packaging
- Aseptic packaging
- Liquid packaging
- Self-adhesive tapes and materials
- Raw materials and consumables

Packaging and Processing Machinery

- Food packaging machinery
- Non-food packaging machinery
- Pharmaceutical packaging and processing machinery
- Food processing machinery
- Dairy processing machines
- Meat, fish and seafood processing equipment
- Confectionery equipment
- Bottling and canning technology
- Brewing and beverage processing
- Liquid processing
- Bulk solids handling
- Palletising and conveying equipment
- Refrigeration and cold chain systems
- Automation and robotics
- Weighing and measurement systems

Printing, Converting and Finishing

- Sheet-fed offset printing
- Rotogravure printing machines
- Flexographic printing machines
- Digital printing machines
- Wide-format and outdoor digital printing
- Label printing machines
- Pad and screen printing machines
- Tinplate printing
- Printing plates, cylinders and films
- Printing inks (offset, flexo, gravure, digital, UV, screen, industrial inkjet)
- Ink dispensers and filling machines
- Cutting, creasing and punching machines
- Dies and die-cutting
- Laser die-cutting
- Folding and gluing machines
- Lamination and coating equipment
- Hot-melt adhesive coaters
- UV coating equipment
- Embossing machines
- Book binding, perfect binding and sewing machines
- Hard case making machines
- Blades and knives
- Graphic arts supplies

WHY YOU SHOULD EXHIBIT

- Reach a market that is being built right now. Odisha's packaging demand is being created by new food processing, pharmaceutical, petrochemical and e-commerce capacity — not competed for in a saturated market.
- Meet decision-makers, not browsers. A curated, invitation-backed trade visitor programme drawing from OASME's membership and the State's DIC network.
- Position your brand at the State's premier packaging platform. Four days of concentrated visibility before Odisha's entire packaging and processing value chain.
- Launch and demonstrate. Live machinery demonstrations remain the single most effective way to sell capital equipment.
- Access policy and finance in one place. State departments, banks, SIDBI, certification bodies and skill institutions under the same roof as your customers.
- Build the Eastern India channel. Meet distributors and dealers covering Odisha, West Bengal, Jharkhand, Chhattisgarh, Andhra Pradesh and the North-East.

Enabling Services and Infrastructure

- Quality control and testing laboratories
- Food safety and hygiene technology
- Environmental Technology
- Effluent and waste-water management
- Recycling Technology
- Storage and Warehousing equipment
- Logistics and Material Handling
- Facility Equipment
- Contract Manufacturing and Packaging services
- Skill and Training Institutions
- Trade Press and Industry Media
- Banks, NBFCs and Financial Institutions

CONVERTING

The converting industry is where raw material becomes a finished packaging solution. PROPACK Odisha 2027 brings together specialists in precision cutting, creasing, folding, lamination, high-speed slitting, coating and finishing — serving both flexible and rigid packaging requirements.

The emphasis at this edition is on efficiency and circularity together: converting lines that reduce waste and energy consumption, solvent-less and water-based processes, mono-material structures that survive the recycling stream, and finishing technologies that deliver shelf appeal without compromising recyclability. Whether you are a converter, a brand owner or an end user, the expo offers a direct route to the machinery, materials and technical partners that will keep your operation competitive through the next regulatory cycle.

CONCURRENT PROGRAMME

Day 1 — Inauguration: formal opening in the presence of State dignitaries, followed by an industry outlook session.

Day 2 — Business and Technical Sessions: technology, finance, compliance and market access for packaging MSMEs.

Day 3 — SheBuilds Odisha: a full day dedicated to women entrepreneurs and women-led enterprises.

Day 4 — Valedictory and Awards: recognition of exhibitors, innovators and enterprises, followed by the closing session.

Structured buyer-seller meets and one-to-one B2B matchmaking will run alongside the exhibition on all four days.
